

# The New T-Cross

Effective from 01.04.2024

The modern city SUV has had a makeover with a revamped design, enhanced standard equipment, new technology features, new alloys designs and a newly designed high-quality interior

The new T-Cross is one of the only vehicles in its class in the world to be equipped with Travel Assist for greater longitudinal and lateral vehicle control. Depending on the traffic ahead and the permitted speed, the T-Cross can control the vehicle's speed with automatic acceleration and braking<sup>1</sup>

1) Within the limits of the system: the driver must always be ready to override the assist system and is not released from the responsibility of driving the vehicle with due care and attention.
